***Drawings***

1. The drawings were received on August 16, 2004. These drawings are acceptable.
2. An amendment was received from the applicant on August 16, 2004.
3. Claim 1 has been canceled.

**Reasons for Allowance**

4. Claims 2-16 are allowed.
5. The following is an examiner's statement of reasons for allowance. The device for guiding an anchor rope as claimed is not shown or suggested in the prior art because of the use of a device that is comprised of a mounting bracket with a base and a pair of sides that are spaced apart to define a channel, a center roller for guiding said anchor rope, said center roller extending between said sides and being disposed rotatably about a horizontal center roller axis that extends between said sides at a location adjacent a front of said channel, and a pair of non-abrasive vertical guides, each of which is located adjacent to and extends along a front portion of a respective one of said sides in order to aid in guiding said anchor rope, where at least one of said non-abrasive vertical guides includes a vertical roller that is mounted for rotation about a vertical axis.

Art Unit: 3617

6. The prior art as previously cited by the examiner shows the use of various forms of boat anchor davits with a center guide roller for guiding an anchor rope or chain. However, none of the prior art cited shows or suggests the use of a device for guiding an anchor rope, said device being comprised of a mounting bracket with a base and a pair of sides that are spaced apart to define a channel, a center roller for guiding said anchor rope, said center roller extending between said sides and being disposed rotatably about a horizontal center roller axis that extends between said sides at a location adjacent a front of said channel, and a pair of non-abrasive vertical guides, each of which is located adjacent to and extends along a front portion of a respective one of said sides in order to aid in guiding said anchor rope, where at least one of said non-abrasive vertical guides includes a vertical roller that is mounted for rotation about a vertical axis.

### ***Conclusion***

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. Any inquiry concerning this communication from the examiner should be directed to Exr. Lars Olson whose telephone number is (703) 308-9807.
